

# EVO™ 750 JETPROP

1

Unit Flow Rate:

75,000m<sup>3</sup>/hr

2

Operating Depth:

Full ocean Depth

3

Supply Flow & Pressure:

30-40 bbl/min @ 3500psi  
Seawater Driven

4

Weight & Dimensions:

Diameter: 2900mm  
Height: 3000mm  
weight: 11,500kgs

**marin**<sup>TM</sup>

The EVO™ 750 JETPROP™ can be used in the following applications:

- Site Preparation
- Top-Hole & Well Head Clean-up
- Deburial/Burial of Cables, Flexibles & Pipelines
- Cable/Pipeline Route Preparation
- Sand Wave Re-mediation
- Subsea Structures Excavation
- Wreck Excavation
- Subsea Manifolds Excavation

The EVO™ 750 JETPROP™ is a drill string deployed Hydrodynamic Mass Flow Excavation (HMFE) tool designed for large scale operations. As this unit is seawater driven it can be utilised in ultra deep water excavations and is not effected by hydrostatic pressure.

Marin's patented V-jet™ and Mono-jet™ attachments can be applied to our systems which allows for increased capabilities in cohesive/consolidate soils and Jet trenching.
